

BHATU INDRASING GIRASE

Software Developer · Full Stack & Backend Development · AI-Integration

Vadodara, Gujarat, India | girasebhatu70@gmail.com | +91-8767133307 | [linkedin.com/in/bhatu-girase-982b48381](https://www.linkedin.com/in/bhatu-girase-982b48381) | github.com/Bhatu-7820 | leetcode.com/u/Bhatu262

Summary

Final-year Computer Science (B.Tech) student with strong foundations in Java and Object-Oriented Programming, Data Structures & Algorithms, DBMS, and Operating Systems. Experienced in designing and developing REST APIs, working with relational and NoSQL databases (MySQL, MongoDB), and building full-stack applications using clean, reusable, and well-documented code following SDLC and Agile practices. Solved 200+ DSA problems on LeetCode and Semi-Finalist at ET Gen AI Hackathon 2026 (500+ teams). AWS Cloud Fundamentals and SQL certified. Seeking an Associate Developer / Software Developer role to design, develop, test, and deploy scalable applications.

Education

B.Tech, Computer Science and Engineering, Parul University, Vadodara, Gujarat — 2023–2027

12th (HSC), R.C. Patel Junior College — 2023 | 10th (SSC), Sanskar English Medium School — 2021

Technical Skills

- **Languages:** Java (OOP, DSA), JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, C(Basics)
- **Backend & APIs:** Node.js, Express.js, RESTful API design, Firebase
- **Databases:** MySQL, MongoDB
- **Frontend:** React.js, Vite, Bootstrap, Redux Toolkit, Three.js
- **Tools & Version Control:** Git, GitHub, VS Code, CI/CD basics, AWS Cloud Fundamentals
- **CS Foundations:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **AI Integration:** AI-Tools, Prompt Engineering, AI-Assisted Application Development

Projects

TravelLoop – AI-Based Travel Planning Platform

2026 – Present

React.js · Node.js · Express.js · MongoDB · Firebase · Gemini API | github.com/Bhatu-7820/Travel_planner

- Built a full-stack travel planning platform that generates AI-powered, personalised itineraries using the Gemini API based on destination, budget, and trip duration, validated with 20+ users.
- Developed end-to-end modules for hotel and vehicle booking, an integrated payment gateway, and a real-time expense tracker, reducing manual trip-planning effort.
- Created a role-based admin dashboard for managing trip packages, discount rules, and customer requests, consolidating multiple operational workflows into one interface.
- Implemented secure authentication with Firebase Auth and built a fully responsive UI with React.js and Tailwind CSS across mobile and desktop devices.

ET NewsEra – AI-Powered News Aggregation System

2026

React.js · Node.js · Express.js · REST APIs · Caching · Gemini API | github.com/Bhatu-7820/ET-NEWS

- Built a real-time news aggregation platform that pulls 300+ live international articles per cycle via REST APIs and generates AI-powered summaries, cutting average reading time by ~60%.
- Designed a multi-layer caching architecture (in-memory + persistent) with automated API failover logic, maintaining 99%+ uptime during third-party source outages.
- Developed a conversational AI assistant using the Gemini API for natural-language news search, enabling article discovery without manual keyword queries.
- Optimized API request batching and response handling to reduce latency and minimize redundant external API calls.

TryOnVerse – 3D Virtual Fashion Try-On Platform

2025

Three.js · React.js · Node.js · MySQL | github.com/Bhatu-7820/TryonVerse

- Built an interactive 3D garment visualizer using Three.js with real-time avatar rendering and camera controls, enabling users to virtually try on clothing.
- Developed an image-based body measurement engine that analyzes user-uploaded photos to recommend accurate apparel sizes, validated with 7 users.
- Designed and normalized a MySQL database schema covering product inventory, user profiles, and order management for scalable catalogue operations.
- Implemented RESTful APIs in Node.js to connect the 3D frontend with backend inventory and sizing services.

Achievements

- Semi-Finalist – ET Gen AI Hackathon 2026 (top teams selected from 500+ participating teams)
- Competitor – Odoo × Adani Hackathon 2025 (Enterprise Software Track)
- Competitor – Techsurf 2025 Hackathon
- Qualifier – Tata Crucible Campus Quiz, 2025
- Solved 200+ Data Structures & Algorithms problems on LeetCode

Certifications

- AWS Cloud Fundamentals — Amazon Web Services, 2024
- Java with Data Structures & Algorithms — 2025
- SQL (Structured Query Language) Certification — 2026
- ET Gen AI Hackathon — Semi-Finalist Certificate, Economic Times, 2026
